- ✓ GS Prelims, GS Mains Paper III
- ✓ Environment, Waste management, 3R Forum, Sustainable development

Recently:

- ❖ The 8th Regional 3R Forum in Asia and the Pacific is all set to commence in Indore from 9 to 12 April 2018.
- ❖ The theme is: "Achieving Clean Water, Clean Land and Clean Air through 3R and Resource Efficiency – A 21st Century Vision for Asia-Pacific Communities".
- ❖ The highlight of the event will be a series of sessions with mayors focusing on sustainable urban development and forging of inter-municipal partnerships and cooperation at the national and international level.

About 3R forum

- The Regional 3R Forum in Asia was launched in November 2009.
- Its objective is to provide strategic policy advices to national government authorities in mainstreaming 3Rs in the overall policy, planning and development.
- These 3Rs are: Reduce, Recycle and Reuse

India and 3R:

- The Forum aims to address how 3R and resource efficiency measures can provide complementary benefits in making cities and countries clean, smart, liveable and resilient.
- The Forum also aims to generate policy-level, institutional level and technological insights towards effective implementation of 3R and resource efficiency to foster circular economic development, sustainable change in current use of natural resources and ultimately achieve a zero waste society.
- In addition, the Forum seeks to engage the public and private sector to explore various partnership opportunities in areas of 3R and waste management for moving towards a zero waste society.
- The Forum further provides an opportunity to establish insightful linkages between the principles of 3R and resource efficiency and the objectives of Swachh Bharat Mission (Clean India Mission).
- Through this Forum, India aims to strengthen this focus through its 'Mission Zero Waste' approach thereby encouraging cities, industries and other diverse stakeholders to see look at waste as a resource.

What did the PM Modi say at the Form?

- "The mantra of 3R – Reduce, Reuse and Recycle- is at the heart of any vision towards the sustainable development of mankind. All stakeholders –producers, consumers and the State alike must adhere to this golden principle which can contribute significantly in solving the twin challenges of waste management as well as the sustainable development".
